Abstract (en)

There is disclosed an adapter for a lighter with a button and a body, the adapter including two casing halves engageable with each other for substantially enclosing the lighter while exposing at least part of a first end of the lighter at which a flame is adapted to be produced, and when the casing halves are engaged with each other and enclosing the lighter, the casing halves are movable relative to each other to move the button of the lighter relative to the body of the lighter to produce a flame. A lighter incorporating such an adapter is also disclosed. <IMAGE>
