Abstract (en)
[origin: WO02075066A1] The invention relates to a drainage device for surface drainage, in particular drainage channels with a channel body, a cover for placing on an upper edge of the channel body and at least one fixing element for fixing the cover to the channel body, or a plinth for reinforcing the upper edge of the channel body. The aim of the invention is to guarantee a secure, vandal-proof fixing of the cover to the body with a simple assembly and a simple lifting of the cover, whereby magnets, in particular, permanent magnets, or electromagnets are used.
