Abstract (en)

A dishwashing machine (1) comprises a washing chamber (3) formed in a machine body (2), a pump (12) for the washing water, spraying means (8) for spraying washing water onto the dishes, a delivery duct (13) for establishing fluid communication between the pump (12) and the spraying means (8), and an electrical resistance (15) associated with a section (14) of the delivery duct (13), for heating the washing water. The dishwashing machine (1) also comprises thermal regulation means (16, 17) for regulating the current supply of the electrical resistance (15) depending on the water level in the section (14) containing the resistance (15). <IMAGE>
