Abstract (en)
[origin: EP1369214A2] Device (1) for joining multi-layered panels made of individual boards (3, 5) comprises a height-adjustable workbench (2). An Independent claim is also included for the production of panels using the above device by nailing together layers of boards arranged at an angle to each other. Preferred Features: A guide for the material is provided at least on one side of the workbench, preferably on two adjoining sides. The device comprises at least one transport device for transporting boards to the processing position.
