Abstract (en)
[origin: EP1369523A1] A laundry washer and dryer machine is described comprising a washing device (1) and a drying device (7) located inside a single cabinet (2) in which said drying device (7) is superimposed onto said washing device (1). The latter comprises a washing tub (3) inside which a first basket (4) is housed that is suitable to contain the laundry to be washed and said drying device (7) comprising a second basket (8) that is suitable to contain the laundry to be dried and at least one motorised fan (18; 31, 33) and resistors (22) for the circulation of warm air suitable to dry the laundry contained in basket (8). The machine comprises two motors (14, 15) for the movement of said first (4) and second baskets (8). The motor (15) for the movement of said second basket (8) and the at least one motorised fan (18; 31, 33) are arranged on respective angular supports (13, 27) of the cabinet (2) in proximity of its side walls (151, 152) and on top of the washing tub (3) in such way that the distance (DS) between the top end (170) of said washing tub (3) and the bottom end (171) of said drying basket (8) is shorter than the distance between the bottom end (173) of the washing tub (3) and the bottom (150) of the cabinet (2). <IMAGE>
