Abstract (en)

Resting device to be placed at resting points of prefabricated modules or en bloc elements, characterized in that it substantially comprises two overlapped plates, respectively upper plate, whereon the prefabricated module or en bloc element rests, and lower plate, which rests on the ground, and means for adjusting the distance between said plates. <??>In this way it is possible to keep each prefabricated module in horizontal position even in presence of irregular and not horizontal grounds. <IMAGE>
