Abstract (en)

The device has a measurement chamber, a transmitter and a signal processing unit with a receiver unit (1) for receiving radiation output by the transmitter and scattered by smoke or other aerosols and an alarm evaluation unit (3). The signal processing unit contains a control loop (5) with a regulating unit (4) and the control parameter for the control loop is superimposed on the output signal of the receiver unit. AN Independent claim is also included for the following: (a) a method of operating especially an inventive device.

Abstract (de)

Bei der Erfindung handelt es sich um einen Brandmelder nach dem Steulichtprinzip und ein Verfahren zu dessen Betrieb, bei dem dem Empfangssignal ein weiteres Signal überlagert wird, um eine hohe Signalverstärkung zu ermöglichen. <IMAGE>
