Abstract (en)

[origin: WO0249597A2] The invention concerns novel cosmetic or dermatological compositions for topical use, in particular for skin and hair protection, characterised in that they comprise, in a cosmetically acceptable carrier, at least: (a) an insoluble organic UV filter with particle size ranging between 10 nm and 5  $\mu$  m, as first filter and (b) a 4,4-diarylbutadiene compound as second filter. The invention also concerns their uses for skin and hair protection against the effects of ultraviolet radiation.
