Abstract (en)

[origin: WO02076438A2] This invention is a method of treatment and prophylaxis diseases regulatable by angiogenesis, including novel pharmaceutical compositions and compounds, useful in the methods for the prophylaxis and treatment of diseases, as well as intermediates and processes useful for the preparation of the compounds of the invention as claimed.

[origin: WO02076438A2] This invention is a method of treatment and prophylaxis of diseases regulatable by angiogenesis, including novel FLT-1 ligands and pharmaceutical compositions containing them, useful in the methods for the treatment and prophylaxis of these diseases, as well as intermediates and processes useful for the preparation of the compounds of the invention as claimed.
