Abstract (en)
[origin: WO02072185A1] An improved breathing circuit to be used to assist patients who are or run the risk of suffering the effects of high altitude sickness, or who have suffered a cardiac arrest, or who have suffered from an interruption of blood flow to an organ or region of an organ and are at a risk of suffering oxidative injury on restoration of blood perfusion as would occur with a stroke or heart attack or resuscitation of the newborn.
