Abstract (en)

[origin: CA2398773A1] In an entertainment, or any other information processing system, in order to provide a startup screen that does not become boring even after being starte d up many times, image drawing data created based on accumulated historical da ta is displayed each time it is started up. The historical information includes the system startup time, the idle time during which no game is executed, the number of times an application is started, the identification number of an optical disk and the application startup time. The display data used in the creation of image drawing data includes the number of drawing objects displayed on the startup screen, their display positions, display colors and opacity and the like.
