Abstract (en)
[origin: WO02075061A1] The invention relates to a machine, particularly a digger, comprising a chassis with a moving gear mechanism and a revolving superstructure with a driver's cabin which is easily accessible and enables a good all-round view for the driver. The driver's cabin (2) has a transparent dome-shaped roof (3) which can be opened and closed on the front thereof, essentially in the region of the surface which enables entry into the cabin (2) when in an open position.
