Abstract (en)  
[origin: WO02073541A1] The printing head (2) of a printing gear (3) in franking machines (1) is susceptible to dust particles, transmitted by objects to be sent, such as letters, postcards or printed products and introduced by the same. A franking machine (1) is thus disclosed, with a suction or compressed air supply device (9) which acts in a protective manner against particulate contaminants, at least in the vicinity of the print head, on the same.
