Abstract (en)

[origin: DE10103948A1] The invention relates to a method and device for inputting control information into a domestic appliance (3), wherein a respective user is biometrically recognized, especially by means of a fingerprint. The invention also relates to a control system. In order to improve upon a method, corresponding device and a control system, a user is identified by biometric recognition of one of several user and/or authorization levels
