Abstract (en)
[origin: WO02069308A2] The invention relates to an indication sign consisting of an at least partially flat support element (10) provided with at least one opening (12) for producing a printed image, a graphic representation and/or a line of characters, whereby said at least partially flat support element (10) is connected on one flat side thereof to a flat electro-luminescence based or luminescent polymer (14), or by means of an illuminated acrylic glass, in order to form backlighting. The opening (12) is filled with at least one partially translucent filling material, particularly a casting resin.
