Abstract (en)

[origin: EP1371302A1] The device has a fan device (4) for producing the air flow, a heater (5) for heating the air flow and a hot air channel (1) for guiding the air flow. The hot air channel is formed into a mixing chamber (8) downstream of the heater for mixing a cold air flow that has not been heated by the heater with the air flow heated by the heater. At least one air guide element (9) is arranged in the mixing chamber.
