Abstract (en)

The invention relates to a method for serving a beverage and a snack, in which use is made of a fastening means (2), by means of which the snack (1) is detachably fastened to a glass (3), a cup, a mug or the like, in such a way that the beverage and the snack can be served together without everything having to be placed on a serving tray. The fastening means (2) is formed by a flexible plate (4) with a bottom part provided for fastening to the snack (1), and with a top part in which at least one lip (5) that can be pushed resiliently out of the face of the plate is cut, by means of which lip the plate (4) can be hooked onto the rim of the glass (3). Such a plate (4) can be made easily with little material, in such a way that the fastening means is suitable for disposable use. <IMAGE>
