Abstract (en)

[origin: EP1371603A2] The height to which the load carrier or fork (5) is lifted is determined. The weight of the load lifted is determined. The collective center of gravity (S) is determined. A magnitude is calculated, which is a function of the fork truck stability in at least one direction. The permissible extent of fork lift truck movement is determined. An Independent claim is included for the corresponding fork lift truck.
