Abstract (en)
[origin: EP1371788A1] Mounting device (1) for sanitary apparatus comprises a mounting frame (2) having on a lower end feet (3) for standing on the floor (9) and on an upper end adjustable side supports (4) for fixing to a wall. Planking rails (11) are arranged on the side supports. Preferred Features: The planking rails extend parallel to uprights (7) of the mounting frame and are fixed at an upper and a lower end to extendable side supports (4, 8). At least the upper side supports can be positioned telescopically in an upper traverse (12) of the mounting frame. The planking rails can be adjusted independently of each other.
