Abstract (en)

Clearing device has a driven shaft (6) in the travelling direction (10) of a vehicle (1) and having a rotation direction (3a) to propel pieces hanging on the shaft from back to front through the ground to be cleared. The ground is pressed down using a roller (4), compacted and smoothed over. Preferred Features: The revolutions of the shaft can be independently adjusted and can be rectified in the rotation direction. The distance of the cross-axles of the roller and the shaft can be adjusted. The weight of the roller can be changed by filling the hollow roller with a liquid. The roller acts as a protective screen against the ground material and exploding mines.

Abstract (de)

Vorgeschlagen wird eine an einem Fahrzeug (1) vorn angebaute Minenräumeinrichtung, die aus einem waagerecht vor dem Fahrzeug angeordneten Flailsystem (3) mit schnell rotierenden elastisch aufgehängten Masse(teilen besteht und einer dahinter und vor dem Fahrzeug angeordneten und geschobenen Druckwalze (4), die den aufgeworfenen Boden glättet und auch als Schutz für das Trägerfahrzeug (1) dient. <IMAGE>
