Abstract (en)
[origin: DE10115563A1] In order to produce (cigarette) packagings of various embodiments, for example standard packages (13), bevelled packages (14), or octagonal packages (15), units and modules of the packaging machine may be replaced or removed from the drive. A package-specific working module is thus provided with a drive, comprising a clutch or disengaging drive parts. The above furthermore are provided with manipulating parts, which permit a setting for engaging or disengaging or for removal of partial units.
