Abstract (en)  
[origin: WO02079048A1] A carton and blank for forming a carton in which a plurality of articles (A) are held in a complementary set of apertures (149) provided in a main panel (116, 120) of the carton so that portions of the articles (A) are exposed to view while other portions are enclosed by other panels (118a, 118b, 114, 122, 112, 124) of the carton. An opposed pair (118a, 118b) of these other panels for flanking body portions of the packaged articles include positioning tabs (148a, 148c; 148b, 148d) which extend into the article receiving apertures (149) so that during loading and formation of the package the articles (A) are urged against the positioning tabs which automatically cause the flanking panels to be pivoted into and held in the article flanking position.
