Abstract (en)
[origin: FR2822809A1] The invention concerns a fluid product assembly comprising: a fluid product dispenser (1) defining a substantially flat body (10) provided with a dispensing orifice (12) and a removable closure member (15) covering the dispensing orifice; and a packaging element (2) encasing the dispenser body (19) leaving the removable closure member (12) accessible to be removed from the body. The invention is characterised in that said packaging element (2) comprises: an envelope part (3) containing the dispenser body (10); and a substantially planar part (4) linked to the envelope part (3) through zones of weaker resistance (43), such that the envelope part (3) can be separated from the planar part (4).
