Abstract (en)

[origin: WO02081787A1] The invention relates to a tank (1) for producing arsenic vapour [in particular intended for epitaxy equipment] comprising a crucible which is placed inside an external housing (12) that is intended to contain leakage. The space between the crucible and the external housing (12) is subjected to a pressure lower than atmospheric pressure. Said crucible is fitted with an outlet duct and a loading flange (14) and is characterised in that the outlet duct and the loading flange (14) are disposed in the upper part of the crucible.
