Abstract (en)
[origin: WO02081849A1] The invention relates to a closure arrangement for a roller shutter cupboard with vertically or horizontally movable roller shutters, constituted by roller shutter profiles (2) whose free ends are guided in guide rails. The inventive arrangement is further characterized in that a guide element (3) each can be introduced into both free ends of the roller shutter profile, the outer contour of said guide element corresponding to the inner contour of the roller shutter profile. At least one guide element comprises a spring, a spring locking element and a closing element (7).
