Abstract (en)

[origin: WO02077438A1] The invention relates to a fuel injection device (10) for internal combustion engines, especially a common rail injector, comprising a housing (12). A fuel high-pressure connection and a fuel return connection (16) are also provided. Said fuel return connection comprises a plug part (20) for connecting to a fuel return line. In order to improve the mountability of the fuel injection device (10), the fuel return connection (16) comprises a socket part (18) which is fixed in a fuel return opening (20) in the housing (12) in a fuel-tight manner, and on which the plug part (20) is placed in a fuel-tight manner.
