Abstract (en)

[origin: WO02071167A2] A manufacturing system comprises materials (110, 120) to be processed, and processing tools (130, 140, 150) for processing said materials (110, 120). To each of said materials (110, 120) there are assigned means (111, 121) for directly exchanging information with said processing tools (130, 140, 150) and for deciding on the basis of said directly exchanged information which of said processing tools (130, 140, 150) is supposed to process a respective material (110, 120).
