Abstract (en)
[origin: WO02054200A2] The present invention relates to a method and system for carrying out Parental Control when browsing the Internet by means of a computer, which comprises: (a) Providing a Parental Control application; (b) Providing in said parental control application several setups, each setup including predefined restrictions for accessing Internet sites or Web pages; (c) Providing at least two mouse components, each mouse component having its unique ID; (d) Associating with each mouse component one or more of said setups; (e) When operating the computer for browsing the Internet, activating said Parental Control application; (f) Retrieving by said application the ID of the mouse component connected; and (g) Activating by said application the setup associated with the ID of said mouse component, thereby activating its corresponding Internet access restrictions. In one embodiment of the invention, the mouse component is the computer mouse. In another embodiment of the invention, the mouse component is a User ID Module.
