Abstract (en)

[origin: WO02082381A1] The invention relates to a method and a device for acquisition and transmission of data of the post input and optionally post output, in particular for PO boxes, which transmit the data from a central post collection centre to the recipient(s) by public telecommunication channels (mobile or fixed-network telephones, cable, satellite, etc) manually or automatically. The advantage for the user is a saving in travel and time, offering a significant cost advantage.
