Abstract (en)  
[origin: EP1209635A1] System having a remote control and a multimedia unit, such as an interactive television, that can be connected to a telecommunications network. The multimedia unit comprises, a central controller, non-volatile memory and an input for telecommunications signals. The remote control has means for encrypting data to transmit to the multimedia unit, which has corresponding means for decrypting the data. An Independent claim is made for a method for secure transmission of data between a remote control and a multimedia unit.
