Abstract (en)

A carton and blank for forming a carton comprising a plurality of panels for forming a sleeve with an access closure structure (50) hingedly connected to the sleeve for opening and closing an access opening, wherein the sleeve has a first locking element (46) disposed inside the sleeve. The closure structure has a second locking element (69) for engagement with the first element to lock the closure structure in the closed position; the first locking element (46) comprises an engaging flap (46) hingedly connected to the edge of the access opening and folded inwardly to lie within the sleeve and the second locking element (69) comprises an engaging tab (69) formed from the closure structure to engage the inner free edge of the engaging flap (46). <IMAGE>
