Abstract (en)

[origin: EP1375402A1] The rewinding machine comprises a winding cradle (8) on which a reel (R) under formation rests. The reel is formed on a winding mandrel which is withheld by a pair of mating centers (17) carried by mobile slides (13). The mating centers engage the ends of the winding mandrel (M) and pull the mandrel (M) during the reel winding cycle. <IMAGE>
