Abstract (en)
[origin: EP1375761A2] The suspended toilet bowl (5), mounted in or at the wall with a conventional carrier system (1), has an integrated mounting plate (2) for a complete swing urinal module (6). The urinal module swings on a horizontal axis (16) between an inactive position against the wall, and a working position with the inflow funnel (10) and its cover (13) at an angle over the toilet bowl with its seat and lid. The toilet bowl and swing urinal module grip around a low-level cistern (3) as an integrated installation, fitted to the common mounting plate of the carrier system.
