Abstract (en)

A system and method of processing an electronic document in a system handling electronic documents in accordance with their classification into classes for electronic documents. The electronic document is supplemented with a classification tool, the classification tool allowing a recipient of the document to manually classify the electronic document as a document of a particular class. Then the supplemented electronic document is transmitted to the recipient. A classification information for the electronic document is provided to the system in response to an interaction of the recipient with the classification tool. The classification information representing the particular class associated to the interaction of the recipient.
