Abstract (en)
[origin: EP1249378A1] The traffic control point (VLS) has a control computer (LR) connected to traffic-influencing components (VK1,VK2) for receiving and/or sending data. The computer controls received data with previously received data and uses different data for updating. User-defined data subscriptions are provided for access only to defined updating data defined in each subscription. AN Independent claim is also included for the following: a method of operating a traffic control point.
