Abstract (en)
[origin: EP1378192A1] An infant seat comprising a back portion, a seat portion connected to the back portion and a sun shield to be connected to said back portion, which is positioned near the back portion with a first end and which is spaced from the back portion with a second end in a sun-shielding position thereof. The infant seat is provided, on a side of the back portion remote from the seat portion, with a storage space extending at least partially around the back portion, which storage space can be closed by means of a cover, with the first end of a sun shield being positioned in the storage space both in a storage position, in which the sun shield is accommodated in the storage space, and in the sun-shielding position.
