Abstract (en)

[origin: EP1378268A1] Support device for the back and head region comprises a back and head region, a back support section (2), and a head support section (5). In the support position, a partial region of the back support section has at the height of the shoulder blade regions a support surface (4) in the spine region and open regions (3) on both sides of the support surface which are designed so that the shoulder blade regions are moved downward past the support surface. Independent claims are also included for the following: (1) Home, leisure or work place device component comprising the above support device; and (2) Attachment unit comprising a head support section, a spacer, and at least one connecting element.
