Abstract (en)

[origin: EP1378473A2] A pocket (20), which runs along a track (10), includes a base section (22) and an upper section (28). The upper section includes an upper gripper (40) for holding the edge of sheet of paper. The upper gripper can be moved between a gripping position and a non-gripping position. The upper section can be moved with respect to the base section to alter the distance of the upper gripper from the base section. An Independent claim is also included for an upper-gripper distance setting method.
