Abstract (en)

[origin: US2004099705A1] The invention relates to a tool bag which can be carried next to the body of a person, the tool bag comprising at least one receiving element for at least one tool. The inventive tool bag respectively comprises a three-dimensional flexible safety chord for each tool associated with a receiving element. The chord can be fixed to the associated tool, and can be fixed to the tool bag in such a way that it can be extracted and automatically retracted by means of an extracting and retracting device.
