Abstract (en)

[origin: WO02083419A1] The invention relates to a transport device comprising at least one transport chain (02) arranged in a displaceable manner in the direction of transport (T) in a guide element (12) and at least one driving means (03, 04) which comes into contact with the transport chain. One section (17) of the guide element (12) which is adjacent to the driving means can be displaced in a lateral manner from the normal position thereof crosswise in relation to the direction of transport, each point of the section (17) of the guide element being displaceable in a direction of movement (B) from said driving means (03, 04).
