Abstract (en)

[origin: DE10215610A1] The system has a device (22) for storing information regarding at least one injector (18) and an arrangement (20) for controlling at least one injector taking into account the stored information. The information is determined by comparing demand values with actual values at several test points for at least one injector and related to the injectors. AN Independent claim is also included for the following: a method of correcting injection behavior of at least one injector.
