Abstract (en)
[origin: WO02084395A1] A flash device (6) with at least one light source, comprising at least one filter (3), in particular a colour filter, arranged in front of the light emitting region of the light sources on the flash device (6). The flash device (6) has a least one support body, with at least two filters (2, 3, 4), in particular colour filters, arranged in said support body. The support body (1) is rotatably mounted, such that, on rotating the support body (1), various filters (2, 3, 4), preferably colour filters, for influencing the light emitted in the light emitting region (5) of the light source of the flash device (6), may be provided.
