Abstract (en)

[origin: DE10117934A1] The device has a motor and at least one gearbox that can be decoupled with a housing (21) with a cylindrical hollow volume (22) in which a planetary gear arrangement (23) with concentric drive and driven shafts (27,28) and a housing is arranged to rotate. The planetary gearbox housing can be rotationally fixed with respect to the gearbox housing by a brake (31) operated by an actuator.
