Abstract (en)
[origin: EP1380530A1] A mechanism for mounting a hoisting machine according to the invention includes guide rails 5a, 5b for guiding vertical movement of a counterweight; a hoisting machine 6 having a traction sheave 61 around which a main cable 10 is to be wound and a drive section 62 for rotationally driving the traction sheave 61; a mount frame 74 on which the hoisting machine 6 is secured; bracing members 746a, 746b which are provided on the mount member 74, retain the mount member in such a manner that the mount member is slidable in a longitudinal direction of the guide rails 5a, 5b, and prevent horizontal runout of the mount member; and support members 71a, 71b which are provided on the guide rails 5a, 5b and support vertical load of the mount member 74 and that of the hoisting machine 6. <IMAGE>
