Abstract (en)

[origin: EP1380694A2] Device (1) for preparing parking spaces (2) comprises at least one electronic control device (10), and one sensor (11) per parking space which identifies the presence and absence of a vehicle or object in the parking space. Each sensor and each blocking unit (9) cooperate with the electronic control device. Each blocking unit is controlled via the electronic control unit using an operating unit (13). An Independent claim is also included for a process for preparing parking spaces. Preferred Features: Each sensor and each electronic control device is arranged on a holding device (3).
