Abstract (en)

[origin: EP1380709A2] Production of a joint-less wall coating on a wall substrate comprises smoothing a spatula of cement in a pasty mass at room temperature of 5-35 degrees C into a thickness of 0.5-3 mm onto the wall substrate, working in a second spatula of cement into the still moist and soft first spatula of cement temporarily after applying the first spatula of cement, and working in a slurry into the undersurface of the spatula of cement. An Independent claim is also included for a wall coating produced by the above process.
