Abstract (en)
[origin: EP1380995A2] The purpose of the present invention is to provide a selector which can select a low magnetic coin and which is inexpensive and can be easily adjusted. A coin-selector of a coin with magnetism which selects either genuine or false of a coin in the process of guiding the coins through the coin passageway comprising a movable magnet which moves at the side of the coin passageway, and a guiding member which moves into the passageway in conjunction with the movement of the movable magnet. <IMAGE>
