Abstract (en)
[origin: DE10254871A1] The holder (1) has an insulating housing, a hollow volume for a cartridge fuse and two conducting elements (9,11) arranged on the housing with sections forming fuse contacts and external contacts for insertion into the terminal strip to contact inner contacts of the strip. The holder can be plugged into the terminal strip in at least two positions in the strip at different angles about an axis perpendicular to the strip.
