Abstract (en)
[origin: WO02086410A1] The invention relates to a reactive armor module (14) comprising a sandwich structure (16) enclosed by a housing (18). Said sandwich structure is configured by at least one sandwich surface element (20) that is bent like a ridged roof and that comprises, between a front board (34) and an intermediate board (36), a high-explosive layer (40), and, between the intermediate board (36) and a back board (38), a damping layer (42) from an elastic material. Preferably, at least two sandwich surface elements (20) that are bent like a ridged roof are disposed one on top of the other in a cross-twisted manner.
