Abstract (en)
[origin: WO02089040A1] The invention concerns an electrical connector for a card (C) comprising, in one (72) of its longitudinal edges (70, 72), a longitudinal notch (75) for locking the card with matching locking means housed in the notch, of the type comprising a carriage (252) for ejecting the card and means (256, 265) for locking the carriage (252) in operating position. The invention is characterised in that the locking means (186) for the card (C, 72, 75) are integral with the carriage (252).
